Professional Summary

Full Stack Software Engineer with 4+ years of experience building production web applications, enterprise SaaS platforms, and AI-powered features with React, Next.js, TypeScript, Node.js, and PostgreSQL. Experienced with WebSockets, hardware-constrained interfaces, RAG and MCP workflows, GitHub Enterprise migrations, and Kubernetes/OpenShift. Interested in defence and command-and-control systems.

Technical Skills

Frontend: React.js, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Vue.js, Vanilla TypeScript, DOM APIs, Web Components

Real-Time & Hardware Interfaces: WebSockets, Biometric Device Integration, Hardware-Constrained Interfaces

Backend & APIs: Node.js, Express.js, REST APIs, API Integrations, OAuth, RBAC

Databases: PostgreSQL, MySQL, Drizzle ORM, Neon

AI Engineering: LLM Applications, RAG, Embeddings, Vector Stores, MCP, AI-Assisted Development

DevOps & Platform: GitHub Enterprise (Migrations), Kubernetes, OpenShift, Docker, CI/CD

Engineering Tools: Git, GitHub, Vercel, Jest, Playwright, React Testing Library

Professional Experience

Software Engineer **Feb 2026 – Aug 2026**

Penieltech LLC | Dubai, UAE

- Developed enterprise HR SaaS applications, ElateHRMS and ElateTime, using React, Next.js, TypeScript, PostgreSQL, and Drizzle ORM.
- Built functionality for recruitment, payroll, attendance, leave management, and employee self-service workflows.
- Developed AI-powered workflows using LLMs, retrieval-augmented generation (RAG), embeddings, and vector stores to retrieve relevant contextual information.
- Integrated Model Context Protocol (MCP) to connect AI applications with contextual data sources and tools.
- Implemented Google OAuth, role-based access control, REST API integrations, and type-safe data models.
- Built real-time messaging features for Elate Chat using WebSockets.
- Integrated biometric attendance devices with ElateTime, handling hardware-constrained interfaces between devices and the software.
- Supported GitHub Enterprise migrations and worked with Kubernetes and OpenShift environments for application deployment.
- Collaborated with stakeholders on application architecture, requirements, troubleshooting, and feature delivery.
- Developed React Native employee self-service features and a Medusa.js storefront with API-driven catalogue and checkout workflows.

Software Engineer **Apr 2024 – Aug 2025**

Turinix | Mumbai, India

- Built and maintained production applications using TypeScript, JavaScript, Vue 3, React, Pinia, and REST APIs.
- Improved page-load performance by 60% through lazy loading and route-level code splitting.
- Supported production applications serving 5,000+ concurrent users with 99.9% uptime.
- Developed a B2B catering platform with multi-step booking, real-time availability, automated pricing, CRM dashboards, and API integrations.
- Built a React-based recipe management portal with role-based access control, contributing to a 25% reduction in waste.
- Developed a React Native application using Expo and Redux Toolkit.
- Contributed automated tests using Jest, Playwright, and React Testing Library, achieving 85% test coverage.

Junior Frontend Developer **Oct 2022 – Mar 2024**

Leopard Tech Labs | Kerala, India

- Developed responsive web applications using JavaScript, Vue 2, and Vuetify.
- Built multilingual booking platforms for three government tiger reserves, supporting 15,000+ monthly bookings.
- Integrated Google Maps, Razorpay, PhonePe, and third-party REST APIs.
- Improved booking workflows, contributing to a 40% increase in online bookings across multiple websites.

Selected Projects

ElateHRMS & ElateTime — Enterprise SaaS and AI Integration

- Developed HR management interfaces and application workflows using Next.js, React, TypeScript, PostgreSQL, and Drizzle ORM.
- Implemented contextual AI features using RAG, embeddings, vector stores, and MCP integrations.
- Connected biometric attendance devices to ElateTime, working within hardware-constrained interfaces to sync attendance data reliably.
- Developed responsive client interfaces using TypeScript and DOM APIs.

Elate Chat — Real-Time Messaging

- Built real-time chat functionality using WebSockets for live, low-latency message delivery.

Food Delivery and Catering Platforms

- Developed customer-facing workflows, administrative dashboards, booking features, and API integrations.
- Improved frontend performance and supported high-traffic production systems.

Education

Amal Jyothi College of Engineering
Information Technology, 2018–2022
Kerala, India
