Professional Summary

Software Engineer with 3+ years of experience specializing in building high-performance, user-friendly applications. Expert in Vue.js (v2 & v3), React, React Native, and Next.js. Proven track record of translating client requirements into polished digital experiences with full-stack capabilities in Node.js, FastAPI, and Golang. Strong collaborative skills with expertise in Git workflows and agile development processes.

Professional Experience

Turinx

Software Engineer

Mumbai, Maharashtra

Apr 2024 – Present

- **Mezeh Mobile App:** Developed a cross-platform mobile application using React Native with Expo to streamline food ordering. Implemented Expo Notifications for real-time order updates and marketing alerts, enhancing user engagement. Utilized RTK Query for efficient data fetching, caching, and state management. Integrated Twilio API for real-time SMS notifications and EmailJS for automated email confirmations.
- **Mezeh Mealtimes (Food Delivery Website):** Architected and developed a dynamic food delivery platform using Vue 3 with Pinia state management. Implemented secure payment processing, real-time order tracking, and a comprehensive user dashboard. Styled the application with Tailwind CSS for a modern and responsive UI.
- **Mezeh Catering Website:** Engineered a separate catering service platform with a focus on large-scale order management. Developed custom forms and a detailed order configuration system for seamless client communication.
- **Mezeh Recipe Management System:** Built an internal recipe management portal using React for the frontend and a high-performance REST API with Golang for the backend. Implemented secure CRUD operations to manage ingredients and recipes for kitchen staff.

Leopard Tech Labs

Junior Frontend Developer

Kottayam, Kerala

Oct 2022 – Mar 2024

- **Access Rooms (Houseboat Booking):** Developed a comprehensive online houseboat booking platform using Vue 2 and Vuetify. Integrated a REST API for real-time availability checking, user authentication, and booking management with the PhonePe payment gateway.
- **Periyar Tiger Reserve:** Built the official website with an integrated ticket booking system and a donation portal with Razorpay payment processing.
- **Mudumalai Tiger Reserve:** Developed the official website with a secure ticket booking system, focusing on seamless user experience and conservation information.
- **Parambikulam Tiger Reserve:** Created the official website, integrating a ticket booking system and showcasing conservation efforts and visitor information.
- **Ole Website:** Developed a corporate digital marketing website to showcase services and portfolio, focusing on a clean UI/UX and modern design.
- **Admin Panel Development:** Designed and implemented custom, analytics-driven admin panels for all key projects, featuring visitor trend analysis, revenue tracking, and role-based access control.

Education

Amal Jyothi College of Engineering

Bachelor's Degree in Information Technology

Kerala

2018–2022

St. Pius X English School

Higher Secondary Education (ISC)

2016–2018

St. Pius X English School

Secondary Education (ICSE)

2016

Technical Expertise

Frontend Technologies: Vue.js (v2 & v3), Next.js, React, React Native, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Bootstrap, Vuetify

Backend & Databases: Node.js, FastAPI, Flask, Golang, PostgreSQL, MySQL, Firebase, REST API Development

State Management: RTK Query, Pinia, Vuex

Development Tools: Git, GitHub, Bitbucket, Jira, Figma, GIMP, MySQL Workbench

Integration & APIs: Twilio API, EmailJS, Razorpay, PhonePe, Payment Gateway Integration

Libraries & Frameworks: Expo, ApexCharts, AOS (Animate on Scroll)

Key Project Highlights

Food Tech Solutions: Developed a comprehensive ecosystem including a mobile app, food delivery platform, catering service, and internal recipe management system.

Government Tourism: Built official websites for multiple tiger reserves with integrated booking systems and a conservation donation portal.

Hospitality Platform: Engineered a full-featured houseboat booking system with real-time availability and secure payment processing.

Admin Dashboards: Created analytics-driven admin panels with role-based access and comprehensive reporting for multiple projects.

Mobile Development: Developed cross-platform applications with real-time features and robust state management.

Core Competencies

- Full-Stack Development (Frontend-focused with backend capabilities)
- Next.js Development (Server-Side Rendering & Static Site Generation)
- Responsive Web Design & Mobile-First Approach
- API Integration & Third-party Service Implementation
- State Management & Performance Optimization
- Version Control & Collaborative Development
- Agile Development Methodologies
- Cross-platform Mobile Application Development
