Professional Summary

Software Engineer with 4 years of experience building scalable SaaS platforms, enterprise applications, e-commerce systems, booking platforms, and cross-platform mobile applications. Skilled in React, Next.js, TypeScript, JavaScript, Vue.js, React Native, Node.js, REST APIs, Tailwind CSS, and Medusa.js. Delivered production systems supporting 5,000+ concurrent users, 15,000+ monthly bookings, 99.9% uptime, and 85% automated test coverage. Strong focus on performance optimization, maintainable component architecture, reusable components, clean code, responsive design, API integration, and product-focused problem solving. Experienced in Agile Scrum collaboration with engineering, design, and business teams using Git, GitHub, CI/CD, Vercel, Figma, Jest, Playwright, and React Testing Library.

Technical Skills

Programming Languages: TypeScript, JavaScript ES6+

Frontend: React, Next.js, Vue.js, HTML5, CSS3, Responsive Design, Component Architecture, Reusable Components, UI Development, Web Performance

Backend: Node.js, Express.js, REST APIs, API Integration

Mobile: React Native, Expo, Mobile Development

Frameworks: Next.js, Vue 2, Vue 3, Medusa.js, Vuetify, Express.js

State Management: Redux Toolkit, Pinia

Styling: Tailwind CSS, CSS3, Vuetify

Testing: Jest, Playwright, React Testing Library, Automated Testing

Databases: PostgreSQL, MySQL, Neon Serverless PostgreSQL, Drizzle ORM

Cloud and Deployment: Vercel, CI/CD

Tools: Git, GitHub, Figma, Algolia, ApexCharts, Google Maps, Razorpay, PhonePe, Code Review

Methodologies: Agile Scrum, Clean Code, Performance Optimization, Scalability, Team Collaboration, Product Thinking

Professional Experience

Software Engineer

Feb 2026 – Present

Penieltech LLC, Dubai, United Arab Emirates

- Built and shipped 2 production SaaS platforms, ElateHRMS and ElateTime, using Next.js, TypeScript, Neon Serverless PostgreSQL, and Drizzle ORM to support recruitment, payroll, attendance, leave management, and workforce operations.
- Developed companion React Native mobile applications for Employee Self Service and Admin users, improving access to attendance, approvals, leave requests, and workforce management workflows across mobile devices.
- Architected scalable and type-safe PostgreSQL data models with Neon and Drizzle ORM, improving maintainability, data consistency, and long-term platform scalability across core HRMS modules.
- Delivered a Medusa.js-based e-commerce platform for Abez Auto with a custom storefront UI, product catalog, checkout flow, and API-driven commerce workflows for online retail operations.
- Collaborated with product and business stakeholders in an Agile environment to translate operational requirements into reliable enterprise applications with clean code and reusable frontend components.

Software Engineer

Apr 2024 – Jan 2026

Turinix, Mumbai, India

- Built a full-stack food delivery platform using Vue 3, Pinia, Algolia, lazy loading, and route-level code splitting, reducing page load times by 60% while supporting 5,000+ concurrent users at 99.9% uptime.
- Developed a B2B catering platform with multi-step booking, real-time availability, automated pricing, and CRM dashboards, streamlining high-value hospitality ordering and sales workflows.
- Created an internal recipe management portal using React and role-based access control, reducing operational waste by 25% through centralized recipe, inventory, and workflow visibility.
- Shipped a cross-platform mobile application using React Native, Expo, and Redux Toolkit with offline-first architecture, improving reliability for users working with inconsistent network access.
- Increased product quality by achieving 85% automated test coverage with Jest, Playwright, and React Testing Library across major frontend and mobile workflows.
- Optimized frontend performance, state management, reusable components, and API integration patterns to improve

maintainability and accelerate feature delivery across SaaS products.

Junior Frontend Developer

Oct 2022 – Mar 2024

Leopard Tech Labs, Kottayam, India

- Built responsive Vue 2 and Vuetify booking platforms with Razorpay and PhonePe payment integration, increasing online bookings by 40% across multiple client websites.
- Delivered booking systems for 3 government tiger reserves with multi-language support and Google Maps integration, processing 15,000+ monthly bookings for public-sector tourism operations.
- Integrated reliable payment workflows handling 500+ monthly transactions with zero recorded payment failures, improving user trust and booking completion rates.
- Designed reusable admin dashboards using Vue.js and ApexCharts with role-based access, analytics views, and multi-format export features, reducing task completion time by 50%.
- Improved frontend maintainability by creating reusable UI components, responsive layouts, and consistent implementation patterns across government and private-sector web applications.

Freelance Project

AGSYBA – Fashion E-Commerce Platform

agsyba.com

Built and deployed a live Medusa.js-based e-commerce platform for a multi-category fashion retailer (women's, men's, kids', footwear, accessories). Developed a custom Next.js storefront with product catalog, variant selection (size and color), cart, wishlist, and a full checkout flow, backed by a scalable Medusa.js commerce architecture.

Education

Bachelor's Degree in Information Technology

2018 – 2022

Amal Jyothi College of Engineering, Kerala, India

Languages

English – Professional Working Proficiency | German – A1 | Malayalam – Native | Tamil – C1

Additional Information

Open to relocation across Germany and the wider European market. Requires EU Blue Card or work visa sponsorship.
