Evin Leyander

Software Engineer | Full-Stack Development | React, TypeScript & Node.js

Kerala, India | Open to Relocation

+91 7510255897 | yjevin75@gmail.com | LinkedIn | GitHub | Portfolio

Professional Summary

Software Engineer with four years of experience delivering SaaS and enterprise applications across web, mobile, and commerce. Builds full-stack products with React, TypeScript, Next.js, Node.js, and Python, backed by PostgreSQL, MySQL, and MongoDB. Recent work includes AI-enabled HR software using LLMs, retrieval-augmented generation (RAG), embeddings, vector stores, and MCP. Partners with product and business teams on API integrations, authentication, and reliable software delivery.

Technical Skills

Programming: TypeScript, JavaScript, Python, SQL, Java

Frontend: React, Next.js, Vue.js, Pinia, Vuetify, React Native, Expo, Redux Toolkit, Tailwind CSS

Backend and APIs: Node.js, Express.js, FastAPI, Spring, REST APIs

Databases: PostgreSQL, MySQL, MongoDB, Neon, Drizzle ORM, database modeling

Messaging and Storage: Redis, Amazon SQS, AWS S3, vector stores

AI and LLM: LLM integrations, RAG, embeddings, vector search, Model Context Protocol (MCP)

Security: Google OAuth, authentication, authorization, role-based access control (RBAC)

Tools and Testing: Git, GitHub, Docker, CI/CD, Jest, Playwright, React Testing Library

Additional Knowledge: GraphQL

Professional Experience

Penieltech LLC | Dubai, UAE

Software Engineer | February 2026 - August 2026

- Built and maintained ElateHRMS and ElateTime, SaaS applications for recruitment, payroll, attendance, leave, and workforce operations, using Next.js, TypeScript, PostgreSQL, and Drizzle ORM; aligned workflow requirements with product and business stakeholders.
- Designed REST API integrations and type-safe PostgreSQL models across authentication, enterprise modules, and third-party services; implemented Google OAuth and role-based access control.
- Integrated LLMs, retrieval-augmented generation (RAG), embeddings, and vector stores into ElateHRMS for contextual retrieval, and connected MCP to application data and tools.
- Contributed to check-printing and e-invoicing software.
- Developed React Native applications for employee self-service and administration.
- Delivered Abez Auto's Medusa.js commerce platform with a custom storefront, catalog, checkout, and API workflows.

Turinix | Mumbai, India
Software Engineer | April 2024 - August 2025

- Optimized a Vue 3, Pinia, Algolia, and REST-based food delivery platform through lazy loading and route-level code splitting, reducing page-load times by 60% while supporting 5,000+ concurrent users at 99.9% uptime.
- Built B2B catering workflows for multi-step bookings, real-time availability, automated pricing, CRM dashboards, and API integrations.
- Developed a React recipe-management portal with role-based access control, reducing operational waste by 25%.
- Shipped an offline-first React Native application with Expo and Redux Toolkit; developed Jest, Playwright, and React Testing Library tests achieving 85% automated coverage.

Leopard Tech Labs | Kottayam, Kerala, India
Junior Frontend Developer | October 2022 - March 2024

- Built responsive Vue 2 and Vuetify booking platforms with Razorpay and PhonePe integrations, increasing online bookings by 40% across multiple websites.
- Delivered multilingual booking systems for three government tiger reserves with Google Maps integration, processing 15,000+ bookings per month.
- Integrated payment workflows handling 500+ monthly transactions with zero recorded payment failures.

Education

Amal Jyothi College of Engineering | Kerala, India
B.Tech, Information Technology | 2018-2022 | Awarded 2022 | CGPA: 6.2/10

St. Pius X School | Kuttikkanam, Idukki, Kerala
ISC - Class XII | 2016-2018 | 68.5%

St. Pius X School | Kuttikkanam, Idukki, Kerala
ICSE - Class X | 2015-2016 | 61.5%
